

EduBridge

A Project

Report On

Placement portal

By

Sahithi k

B.Tech

Batch: 2021 – 5761

Center: Bangalore- Palya

Under the Guidance of,

Jayant V.

Technical Trainer

EduBridge

(School of coding)

Introduction:

Placement Portal manages student information in the college with regard to placement. It improves existing system .It has the facility of maintaining the details of the student, thereby reducing the manual work. It will save time and energy which are spending in making reports and collecting data. Placement Management System can be accessed throughout the college with proper login provided. Our Project Include

Modules:-

- Admin Module
- User Module

I have developed this Application in **Java, JSP, Servlets, Hibernate and MySQL**. It's a web-based projects so I have used **HTML, CSS, JavaScript and Bootstrap also**.

The main feature of the project is to make placement portal easier. You can access this website from anywhere and everywhere.

In Admin module, admin can add the job role and view user detail in the specific category. He can also view the total number of users at present in the website. And job role and user details also. Admin can only see the Notifications of Users.

In User module, user can access the website and apply job and shuffle by category. New user can register and login after that to portal. user can access to job they applied to the job role.

Software Requirements:

Front end: Java/J2EE technologies (Servlet, JSP), HTML, CSS, JavaScript, Bootstrap, Hibernate.

Back end: MySQL workbench 8.0.23CE.

Middleware/Server: Apache Tomcat. IDE: Eclipse IDE for Java EE Developers

Browser: Best result on Google Chrome

Operating System: Window 10.

Data Dictionary

MySQL

Create Database placement;

- Set :
database.driver=com.mysql.jdbc.Driver
database.url=jdbc:mysql://localhost:3306/ placement
database.user=root
database.password=Rootss

Hibernate:

- Set : hibernate.dialect=org.hibernate.dialect.MySQLDialect
hibernate.show_sql=true
hibernate.format_sql=true
hibernate.hbm2ddl.auto=update

- Map Tables;
hibernate.mapping_class=Register
hibernate.mapping_class=Contact

hibernate.mapping_class=Jobs

hibernate.mapping_class=User details

- Create Tables using this Annotations.

Register Page:

The image displays a registration form overlaid on a futuristic, blue-toned background with glowing lines and icons. The form is titled 'Register' and contains the following fields:

- Name:** A text input field with the placeholder 'Enter your name'.
- Email:** A text input field with the placeholder '234567890'.
- Contact:** A text input field with the placeholder 'Enter your number'.
- Password:** A text input field with the placeholder '*****'.
- Role:** A dropdown menu with the text 'Select one' and a downward arrow.

At the bottom of the form is a large, blue-to-purple gradient button labeled 'Register'.
